1. Data covers November 2015 to November 2018. 2015 includes only Nov-Dec, so it is not comparable with full years (2018 covers Jan-Nov).
2. Agricultural Vehicles has only 1 claim in the period, so its results are not credible.
3. Years are policy renewal years, using written premium. Accident year is not available, so figures are not earned or accident-year based, and recent years may be understated by claims development. The overall loss ratio (48.61%) is the more reliable measure.
